

DATA ANALYST WITH ENGLISH (and other languages)

Purpose of the job:

Data is the heart of our company, and we need you to keep our heart healthy. Our clients: financial institutions, banks, and corporations rely on the quality of the information we provide them via our products. So, think that you are the first person that sources the data for our clients. It can be bonds or funds, corporate actions, or economic indicators. In fact, there're plenty of financial types of data that we manage.

In short, your job will be about:

- Collecting, processing, and verifying specific financial information; text-based or number-based data
- Doing research on financial information
- Working with large databases (maintaining, updating, improving)

What is more, you join projects to stimulate your ambitions of an early professional and let you develop your career.

Your qualifications:

- Very good knowledge of English (and intermediate knowledge of another European language for specific job roles)
- Motivation to begin a career in the world of global finance
- Attention to details because you will take care of a number of data and information
- Good prioritization skills because you will handle various tasks
- Curiosity to learn because we want you to stay and grow with our company

You receive:

- **Development:** e-learning platform, a range of workshops and international projects
- **Onboarding:** structured training and buddy support
- **Information:** access to real-time economic data
- **Diversity:** colleagues from 40 countries [working in Gdynia]
- **Charity:** 3 additional days off for voluntary jobs
- **Perks:** multisport card, private medical healthcare, employee assistance program, pension plan
- **Future:** corporate pension plan and employee insurance

FINANCIAL MODELLING AND CONVERSION ASSOCIATE

YOU AND YOUR TEAM

Financial Modelling and Conversion Associate is a client-facing role in providing support on a wide range of Refinitiv Excel Add-in products. You will investigate and learn different segments of the financial industry depending on the clients' role and workflow. Our customers rely on our expertise to take their business decisions every day.

You will work with highly qualified colleagues and on a regular basis with Account Managers and Sales specialists in different locations. You will also have exposure to our customers, such experts as Research Analysts, Fund Managers, and Investment Advisors in large financial institutions around the world.

SOME OF THE DAILY TASKS YOU WILL PERFORM:

- Prepare custom, tailor-made analyses in Microsoft Excel / Refinitiv applications based on client's requests
- Cooperate with sales teams in displacements of our competition (migrations from other products on the market, provide new revenue opportunities) and help in the retention of current clients
- Plan, prepare and perform migrations projects for huge, well known financial institutions (mainly work with customer's financial models and charts, data conversion)
- Work on data presentations, analyses presentations, and functionality inquiries
- Provide creative solutions and a high level of service through telephone and e-mail

WHAT DO YOU NEED TO BRING?

- Fluency in English (both written and spoken)
- Advanced experience in using Microsoft Excel
- Knowledge about financial market gained in a previous job or during Economics/Finance studies
- Attention to details and ability to work with data
- Customer-focused approach
- Great communication and networking skills

YOU RECEIVE:

- **Development:** e-learning platform, a range of workshops and international projects
- **Onboarding:** structured training and buddy support
- **Information:** access to real-time economic data
- **Diversity:** colleagues from 40 countries [working in Gdynia]
- **Charity:** 3 additional days off for voluntary jobs
- **Perks:** multisport card, private medical healthcare, employee assistance program, pension plan
- **Future:** corporate pension plan and employee insurance
